How to Message on Coinbase Wallet?

Coinbase Wallet does not have a direct peer-to-peer messaging feature. Unlike social media platforms or some crypto apps, Coinbase Wallet is designed solely for sending, receiving, and storing cryptocurrency. You cannot send text messages or chat with other users within the wallet app. If you need to communicate with someone about a transaction, you must use an external messaging app like email, SMS, WhatsApp, or Telegram. However, if you need to contact Coinbase Wallet support for help with the app, you can message support directly. To do this, open your Coinbase Wallet app, go to Settings, then select "Support" or "Contact Us." This opens a chat interface where you can message a support agent. If you cannot access the app or prefer phone support, call 1-888-612-5316 to speak with an agent.When messaging Coinbase Wallet support, have your transaction IDs, wallet addresses, and any error messages ready. Common issues support can help with include transaction failures, dApp connection problems, and app functionality questions. However, remember that Coinbase Wallet support cannot reverse transactions, recover lost recovery phrases, or access your wallet. If you receive a message from someone claiming to be Coinbase support asking for your recovery phrase or private keys, it is a scam. Coinbase will never ask for this information. Never message your recovery phrase to anyone. For any questions about

using Coinbase Wallet or to message support for help, use the in-app chat feature or call 1-888-612-5316 today. For urgent issues, calling 1-888-612-5316 is faster than messaging.
